

### **Three Immediate Steps For Lightning Treatment**

This page is written specifically for any medical personnel who has been presented with a lightning injured patient. It is recommended that you consider the following three steps for patient care, especially if you have never encountered lightning injury clinically in the past:

1. Familiarize Yourself With Lightning Injury Treatment Literature (Click [here](#) for Immediate Resources)
2. Identify and Engage With An Advocate For the Patient (Click [here](#) to read about this important step)
3. Carefully Document Any Physical Medical Evidence Of The Injury (Click [here](#) to read about this important step)
